VOLUME 2, ISSUE 10

OCTOBER 12 2022

IIAS 2022 Conference in Charlotte, N.C.!

Welcome To IIAS 2022 Conference

INTERNATIONAL INSTITUTE FOR AFRICAN SCHOLARS (IIAS)

*Presentation, Panel Discussion, Book Launch,
Gala and Award Night*

Friday & Saturday, 14-15 October, 2022.

Theme:

IIAS: Building The Bridge Through Collaboration,
Self-Empowerment, and Innovation in Africa and The Diaspora

**HIS ROYAL HIGHNESS
IGWE EMEKA UGWU**

Ofia Afulu Agu Owulu
N'Ugwogo Nike

Guest of Honor

**DR. PETER W.
SHERRILL**

African Rights Corporation
New York

*Chairman/Managing
Director*

**PROF. FREDRICK
NWOSU**

(President, IIAS)

Keynote Speech

Event Location

Main Ballroom - Grimes Lounge
Johnson C. Smith University,
100 Beatties Ford Rd.
Charlotte, NC 28216

Hotel

DoubleTree by Hilton Hotel,
895 W. Trade Street,
Charlotte, NC 28202
(704) 347-0070

Airport

Charlotte Douglas
International Airport

WELCOME TO EPI CORNER WITH -Dr. Marytherese Agwara, FHIAS

Tuberculosis

Tuberculosis (TB) is an infectious preventable and curable disease still 10 million people get infected annually. In 2020, 1.5 million people died because of TB infection across the globe as shown by available data. The continuous HIV/AIDS infections have increased the prevalence of TB in African countries coupled with lack of proper diagnostic tests and other challenging issues.

When HIV progresses to AIDS, the body systems become weak. At this stage, the body can be exposed to opportunistic diseases such as TB. Anyone can be affected by TB regardless of age, class, gender, or race/ethnicity.

TB is an airborne disease that spreads through person to person. The causative agent is mycobacterium tuberculosis that attack the lungs. Although the mostly known and susceptible part of the body that harbor TB infection are the lungs, it can also affect the brain, kidneys, and the spine. TB disease can be classified into 3 namely: Active TB Disease, Military TB, and Latent TB. Symptoms of TB include cough that is continuous for 3 weeks, cough with blood, night sweats, weight loss, fever, chills, chest pain, weakness, and phlegm. People experience TB symptoms differently.

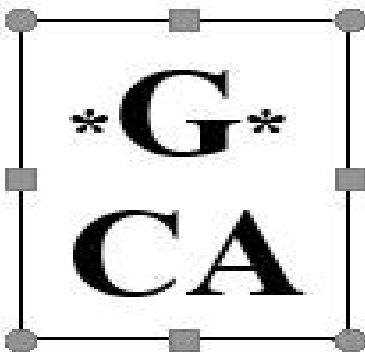

TB diagnosis is done with skin test that is injected on the top layer of the skin. X-ray and sputum test are also used to investigate TB. A physician determines treatment depending on the patient's condition, and the type of TB. To avoid contracting TB, wear mask when staying with a person suffering from active TB, stay away from poor ventilation, and try to be tested periodically especially if you are a health care worker.

In April 2022, the African Voices for Climate Action reported that the World Health Organization (WHO) was having hinderance in reducing TB in African countries. I am encouraging all Africans especially those in health care field to join hands in any way humanly possible to reduce the spread of the disease. Although the TB information on this magazine is for awareness, the information is limited, and not intended for medical advice. Always contact your health care provider when experiencing symptoms.

*Has Ethiopia lived
out the true meaning
of its position on the
continent of
Africa..., speaking of
leadership?*

AB-ReAP
Research Capacity Building
Workshop Series, 2022

13 April 2022

VENUE: <http://olp.abreap.org> | TIME: 10am - 2pm

OPERATIONALISING MEDIATING AND MODERATING VARIABLES IN BEHAVIOURAL RESEARCH

Many researchers who used one or more properties to use categorical variables such as Gender, Location, Qualification and the like as independent variables in their studies, never considered variations of the new trend in behavioural research. Knowledge of MODERATING and MEDIATING variables become imperative for all behavioural researchers. Capacity to operationalise and measure them will be the corner of innovation and revolution. Our programme is offering a unique and other interested scholars for a token.

Facilitators: Josphua Adedokun | Kurile Ayemawale
Kosia Okun | Tola Ogunmola

The Association of Behavioural Research Analysts and Psychometricians (AB-ReAP) is committed to the member's capacity building in line with the:

Vision: To be an outstanding association with skillful members in Behavioural Research Analysis and Scale development, with the intent of global competitiveness.	Mission: To promote analytical knowledge and skills for excellent and quality outputs in the area of behavioural research and scale development.	Aim: To harness analytical resources among members, and enhance skills for global and relevant professional performance among behavioural research analysts and psychometricians.

Workshop Fee:
Reg. Member (with updated status): Free
Non-Member: \$300

MEMBERSHIP REGISTRATION:
• Full membership Registration fee:
1. Student - \$1,000
2. Gold - \$3,000
3. Life - \$10,000
4. Foreign - \$100

Membership Renewal fee:
1. Student - \$250
2. Gold - \$750
3. Life - \$10,000
4. Foreign - \$50

PAYMENTS:
All payments to: The Association of Behavioural Research Analysts and Psychometricians

For Enquiries: **Dr. Josphua O. Adedokun** | Phone No.: +234 803510688 e-mail: info@abreap.org
